

Stretch Your Innovation & Sustainability

Golden Phoenix Fiberwebs Inc. (GPF) is an innovative market leader of **Elastic Nonwovens** and **Elastic Laminates** with exclusive patented technology, developed in Taiwan since the year 2000. We create to stretch your innovations further. We elevate our products so our clients can elevate theirs for their end users.

We have inherited advanced technical knowledge from Promax our partner fabric company which has been at the forefront of textile making for the past 30 years and first launched Elaxus® and an array of revolutionary products.

Diverse Array of Product Capability

Structure – one to four layers, 16 to 150 gsm
Hand Feeling – stiff, soft or smooth touch
Function – Stretch range, direction or breathability
Appearance – color, pattern, 3D visuals or bulkiness

Autonomous Flat Organization

Efficient communication line
Swift reaction to market dynamics

Vertically Integrated Lines

Flexible production and development
Less uncertainty and more reliability
Stable and comprehensive quality management

Sustainability for Better Future

Internal recycle system and zero waste
Less materials without sacrifice of performance
OEKO-TEX STANDARD 100 / REACH SVHC / Odorless / 100% Recyclable

Applications : Tailored to your needs

Hygiene / Medical / Pet Care / Personal Care / Beauty / Garments / Other Industries

Innovative Solutions for Hygiene Products

GPF has been devoted to the hygiene industry since 2004. We developed elastic nonwovens from our exclusive patented technology, giving nonwoven laminates stretch ability, comfortable fit and superior closure efficiency.

Elastic Waistband

Perfect Elasticity

Elongation 200-300% allows both standard and full-width waistband feasible

Comfort & Fit

Proper 2nd unload force prevents leaks and falling off

Easy Converting

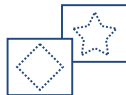

Nonwoven laminate lets die-cut process more easily and rapidly

Value-added Options

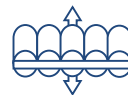

Perforation

Breathability available for all laminates

Embossment

Pattern places an embellishment and allows higher stability for production

3D Structure

Accordion-like laminate not only optimizes function, but also makes placement on top sheet feasible

Color

Available in pink, yellow, green, blue, purple, etc.

Innovative Solutions for Hygiene Products

GPF has been devoted to the hygiene industry since 2004. We developed elastic nonwovens from our exclusive patented technology, giving nonwoven laminates stretch ability, comfortable fit and superior closure efficiency.

Elastic Side Panel

Tailored Stretch

Elongation with 10N available in a wide range of 100-300% can be tailor-made for all customers

Comfort & Fit

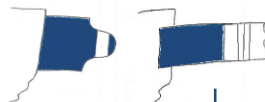

Excellent closure efficiency guarantees an ideal stretch within minimum deformation

Perfect Touch

Diverse options of softness like stiff, soft or smooth touch can match your product

Specialization & Tailored Service

for S-cut Ear & Elastic Tape

Solid Engagement

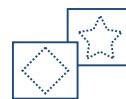

Professional treatment benefits our customers attaching hooks in a more stable area and avoids hooks loosening

Stability & Speed

Stiff or less soft nonwoven lets both stability and speed of converting on machine to be realized

Value-added Options

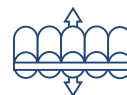

Embossment

Pattern places an embellishment and allows higher stability for production

Perforation

Breathability available for all laminates

3D Structure

Accordion-like laminate not only upgrades performance, but also makes its touch more premium

Color

Available in pink, yellow, green, blue, purple, etc.

Elastic Nonwoven & Laminate Solutions

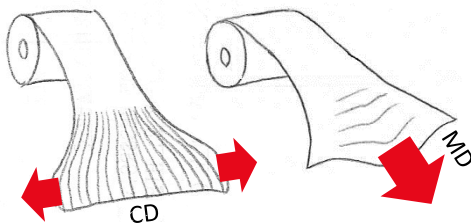

The manufacturing of single-layered elastic nonwovens is the core technology of GPF. We utilize our advanced machines to make the nonwovens stretchable through patented processes and also can further laminate nonwovens and film without adhesive.

In response to different use purposes or function requirements, we provide you Single-layered Elastic Nonwoven or Multi-layered Elastic Laminate as per your tailor needs.

Our Highlights

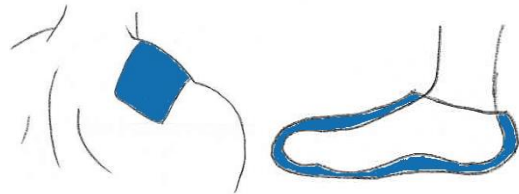

Multifaceted Solutions to satisfy your Innovations

- Wide range of basis weight, 16-150gsm
- A number of options for elasticity, 1.5-3.0
- Stretch available in either CD or MD

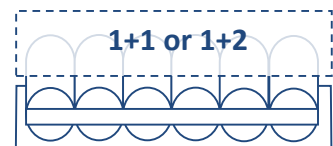

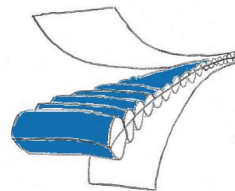

Stretch and Fit your body for Comfort

- Our elastic nonwoven can be extremely light and thin, using it is just like being unclothed.
- Its low initial stretch force is easy to wear and fit on

A Superior & Brilliant Choice of Composite Materials

- Bulky 3D structure is recommended for support and cushion
- Diverse uses, no matter one or two layers of composite

Value-added Options

Perforation

Breathability is available for all laminate products

Embossment

Pattern places an embellishment and creates a differentiated design for your product

Perfect Touch

Diverse options of softness like stiff, soft or smooth touch can match your product

Color

Available in pink, yellow, green, blue, purple, etc.
